

3PHASE OVR (OVER VOLTAGE RELAY)

OVER VOLTAGE RELAY (OVR):

Operating Voltage	415V AC +15% -20%
Under Voltage Operation	Yes at 75%
Response Time	< 20mSec
Setting	Factory Default
Relay Contact	5A Potential free. COM-NO-NC
Power Consumption	13mA 0.08W
Relay Operation:	Relay is energised in healthy supply conditions and trips on Over voltage condition when supply voltage is over 460V $\pm 10V$ (3phase) or 265V $\pm 5V$ (single phase).
Reset	Auto Reset (ON-DELAY can be added if required)
Mounting	Din Rail or Chassis Mounting
Dimension	45mm X 76mm X 114mm
Weight	400 grams(approx..)
